1. IDENTIFICATION
Product Name: Poly-Tung-O
Typical Use: Welding Wire
Manufacturer: Polymet Corporation
10073 Commerce Park Drive
Cincinnati, OH 45246
(513) 874-3586 from 8 a.m. – 5 p.m., EST

2. HAZARDS IDENTIFICATION
The article is NOT classified as dangerous according to directive 1999/45/EC.

BYPRODUCTS GENERATED DURING THE THERMAL SPRAY OR WELDING PROCESS ARE CONSIDERED HAZARDOUS.

WARNING
HAZARD STATEMENTS:
May cause cancer by inhalation
May cause an allergic skin reaction

PRECAUTIONARY STATEMENTS:
Obtain special instructions before use
Do not handle until all safety precautions have been read and understood
Avoid breathing dust or fume
Wear protective gloves, protective clothing, eye, and face protection
Contaminated work clothing should not be allowed out of the workplace
If exposed or concerned, get medical advice/attention
See Section 11 for more detailed information on health effects and symptoms.

3. COMPOSITION / INFORMATION ON INGREDIENTS

4. FIRST-AID MEASURES
These measures apply primarily to the byproducts produced during welding.

Inhalation: Move exposed person to fresh air. Keep the person warm and at rest. If not breathing or if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Obtain medical attention if symptoms occur. If unconscious, place in recovery
position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion: Wash out mouth with water. Remove dentures if any. Move exposed person to fresh air. Keep the person warm and at rest. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Obtain medical attention if symptoms occur. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Skin Contact: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Obtain medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.

Protection of First Aiders: No action shall be taken involving any personal risk or without suitable training. See Section 11 for more detailed information on health effects and symptoms.

5. FIRE-FIGHTING MEASURES
This section applies primarily to the wire as supplied.

Extinguishing Media
- Suitable: Use an extinguishing agent suitable for the surrounding fire.
- Not Suitable: None known

Special Exposure Hazards: No specific hazard
Hazardous Thermal Decomposition Products: Some metallic oxides
Special Protective Equipment for Fire-Fighters: Fire-fighters should wear appropriate protective equipment and self-contained apparatus (SCBA) with a full face-piece operated in positive pressure mode.

6. ACCIDENTAL RELEASE MEASURES
These measures apply to the wire as supplied and the byproducts produced during the welding process.

Personal Precautions: Immediately contact emergency personnel. Keep unnecessary personnel away. Use suitable protective equipment.

Environmental Precautions: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Methods for Cleaning Up: Use appropriate tools to transfer the spilt solid to a convenient waste disposal container. Recycle if possible.

7. HANDLING AND STORAGE
This section applies primarily to the wire as supplied.

Handling: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking.

Storage: Keep container tightly closed. Keep container in a cool, well ventilated area.

Packaging Materials Recommended: Use original container.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION
This section contains information which applies during the welding process.

<table>

Date of Issue: 6/30/15 Product: PolyTung-O
### Exposure Controls

#### Occupational Exposure:
Use process enclosures, local exhaust ventilation or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fumes or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.

#### Respiratory Protection:
Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

#### Hand Protection:
Gloves should be worn to minimize contact. During the welding process, heat insulated gloves are recommended.

#### Eye Protection:
Safety glasses or goggles are recommended when handling this material. During the welding process, safety goggles and dark lenses must be worn.

#### Skin Protection:
Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

#### Hearing Protection:
During the welding process, the operator and other personnel close to the welding operation must be protected from excessive noise. Hearing protection that meets local standards should be used.

#### Hygiene Measures:
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

### 9. PHYSICAL AND CHEMICAL PROPERTIES

This section applies primarily to the wire as supplied.

#### General Information

**Appearance**

</table>
10. STABILITY AND REACTIVITY
This section applies primarily to the wire as supplied.

Stability: The product is stable under normal storage conditions.

Conditions to Avoid: Store in a cool dry place away from incompatible materials.

Materials to Avoid: Strong acids

Hazardous Decomposition: During the welding process, gaseous reaction products may include carbon monoxide and carbon dioxide. Ozone and nitrogen oxides may be formed by radiation from the arc.

11. TOXICOLOGICAL INFORMATION
This information applies to the wire as supplied and the byproducts produced during the welding process.

Potential Acute Health Effects
Inhalation: Exposure to high concentrations may result in health complaints. Irritating to respiratory system. Exposure may result in depressed respiration, coughing, nausea and sore throat. Prolonged or repeated exposure to large amounts may cause damage to lungs (lung edema).

Ingestion: Prolonged or repeated exposure may be irritating to mouth, throat and esophagus (sore throat, nausea).

Skin: Exposure to high concentrations may result in health complaints. Prolonged or repeated exposure may be irritating (redness, pain).

Eyes: Moderately irritating to eyes.

Acute Toxicity

<td>Oral</td>
<td>Rat</td>
</tr>
</tbody>
</table>

Potential Chronic Health Effects
Carcinogenicity: No known significant effects or critical hazards.

Mutagenicity: No known significant effects or critical hazards.

Reproductive Toxicity: No known significant effects or critical hazards.

Over-Exposure Signs / Symptoms
Target Organs: Contains material which causes damage to the following organs: blood, kidneys, lungs, upper respiratory tract, skin, central nervous system (CNS), eye lens or cornea.

12. ECOLOGICAL INFORMATION
This information applies to the wire as supplied.

15. REGULATORY INFORMATION
This information applies to the wire as supplied.

EU Regulations
Hazard Symbol:

Risk Phrases: This product is not classified according to EU legislation.
Safety Phrases: S23 – Do not breathe fumes
S36/37 – Wear suitable protective clothing and gloves
S38 – In case of insufficient ventilation, wear suitable respiratory equipment
S51 – Use only in well ventilated areas
Product Use: Classification and labeling have been performed according to EU Directives 67/548/EEC and 1999/45/EC (including amendments) and the intended use.
Industrial Applications: Used by welding.

16. OTHER INFORMATION
This information applies to the wire as supplied and the byproducts produced during the welding process.

Full Text of R-phrases:
R15 – Contact with water liberates extremely flammable gases
R10 – Flammable

Full Text of Classifications:
F – Highly Flammable
